About Technique Microsystems Ltd.

Established in 1990, Technique Microsystems Ltd. began building custom storage solutions for the digital A/V community in Toronto, one of the worlds' hottest areas for post production.

Simultaneously, Technique Microsystems Ltd. established a strong competency in the design, integration and maintenance of networking solution topographies. Today, Technique Microsystems Ltd. has emerged as a key Value-Added Partner in the comprehensive managed SMB Network Services space. Through careful consultations with our clients and accommodating special and unique requirements, we have established a reputation for value, flexibility and rock solid dependability.

By providing exceptional value-add combined with relentless service, Technique Microsystems Ltd. has evolved its business model and now boasts expertise in a wide number of technical areas including web design, hosting, structured maintenance and managed services. We also engage as outsourced IT for small and medium business networks.

No matter what industry you're in, your business is intrinsically dependant on your IT infrastructure. You can depend on Technique Microsystems Ltd. to keep it functioning smoothly and efficiently.
