Symantec Multi-Tier Threat Protection for Small Business

By Nickangel
Created 03/13/2009 - 04:09

Antispam Antivirus Multi-Tier Threat Protection Security Small Business Symantec

The new version of Symantec Multi-Tier (v.11.02) now includes the full Symantec AntiSpam subscription at the server level if you are running Microsoft Exchange. This now saves our clients hundreds of dollars per year as you no longer have to get AntiSpam separately! If you are already subscribed to support for a previous Multi-Tier version you get this upgrade for free.

Keep in mind that you do have to ensure that you don't let your subscription lapse. There is a grace period on the Antivirus/AntiMalware protection but NOT on Antispam. We ensure that our clients are always up to date to help prevent spam bombs from bursting your mailboxes on Monday morning! Call us to find out more.
