Easy Remote Desktop Support

Support

With remote desktop support you can get immediate help with your computer problems and save time and money too! With your permission, our technicians will connect to your computer remotely and solve your problem quickly and efficiently, while saving you much of the time and cost associated with an onsite call.

Getting remote support from Technique Microsystems is easy as 123:

1.) Install the CrossLoop client from http://download.crossloop.com/crossloopsetup.exe [1].
2.) Sign in with our support account, or get your own here: https://www.crossloop.com/quicklogin.htm [2]
3.) Give our technician your access code, sit back and relax.

When we're finished fixing your problem, you can uninstall the software, or leave it there for even faster help next time.

To get started, please call 905-564-5722 or 1-800-267-5722 and ask for support!

Enjoy!
