BlackBerry Enterprise Server Express now avaliable for FREE

BES Express blackberry Networking Software Support

BlackBerry® Enterprise Server Express enables businesses of any size to quickly and easily get started with the BlackBerry solution. It provides advanced BlackBerry smartphone features with no additional software or user license fees, and works with any Internet-enabled BlackBerry data plan or a BlackBerry enterprise data plan.

BlackBerry Enterprise Server Express offers IT control and security features you can trust even for employees that choose to bring their own BlackBerry® smartphone into your business.

BlackBerry Enterprise Server Express is certified for up to 75 BlackBerry smartphone users to be installed and run on the same server that runs Microsoft® Exchange 2003 SP2, 2007 SP1, 2010 or Windows® Small Business Server 2003 and 2008. This eliminates the need to purchase additional hardware. If you require greater than 75 users, BlackBerry Enterprise Server Express has the flexibility to be installed on a separate server, supporting up to 2,000 BlackBerry smartphone users per server.
